PHILIPS Saeco

Highlights

Auto cleaning and descaling

Saeco designed this espresso machine to automatically clean its coffee circuit with water upon starting up or switching off of the machine, this delivers a great, fresh taste with each cup of coffee. Regular descaling prolongs your espresso machine's life. This machine will not only prompt when descaling is needed, the automated descaling process will start on your machine and guides you with clear on-screen messages when you have to intervene. Descaling has never been so easy!

Dishwasher safe Cappuccinatore

Keep the Saeco espresso machine at its best, by cleaning the automatic Cappuccinatore simply washing it with lukewarm water or directly into the dishwasher machine.

Extra robust and accessorized

Extra robust, extra accessorized

Saves your coffee settings

You will always get a perfect cup of espresso brewed just for you, according to your personal preference, thanks to our innovative memo function to adjust the coffee length, strength and temperature. Enjoy a superb coffee drink in your favorite cup with just the press of a button.

Automatic milk frother

Preparing a tasty cappuccino is easy with this Saeco espresso machine thanks to the new, patented automatic milk frother with its cyclonic chamber. The milk frother, which baristas also call "cappuccinatore", will draw milk directly from a milk carton or jug and froth it automatically, dispensing it directly into your cup. And thanks to the exclusive cyclonic chamber, a constant flow of milk without any splashing is guaranteed.

100% ceramic grinders

This espresso machine is equipped 100% ceramic grinders. Saeco uses ceramic grinders because of their consistent grind without overheating the coffee bean for an impeccable espresso. Ceramic also ensures long-lasting performance and a totally silent operation.
